Project # 1

Flowcharting

1. Create a flowchart using flowcharting symbols (oval, diamond, parallelogram, rectangle) and flowlines to document the steps and decisions you make when you get up in the morning.

2. The flowchart must include at least 3 decisions and 2 processes with the flowlines indicating the sequence of events. (Hint – shower, brushing teeth, drying hair, getting dressed, breakfast). Use the PAINT utility provided with Windows under Accessories or a graphic package of your own choosing to create your flowchart.
